

QUALITY INDICATOR FRAMEWORK (QIF)

1.3.2 Average percentage of courses that include experiential learning through project work/ fieldwork/internship during academic year 2022-23.

Institute follows the affiliating University syllabus for executing the teaching learning process. University envisions completeness of courses by experiential learning through some of the mandated courses such as project work/ fieldwork / internship.

The project work is understood as per the IEEE definition that it is a work where students Showcase their learning in different courses by selecting a particular work and executing that.

In Engineering most of the courses correspond to project work. Therefore project work is being mapped to various courses and we directly claim that most of the courses has a project work.

- Number of courses that include experiential learning during 2022-23 = 269
- Number of courses across all the programs in 2022-23 = 300

$$\begin{aligned} \text{Average percentage of course that include} &= \frac{\text{Number of Experiential learning courses}}{\text{Total number of courses}} \\ \text{experiential learning during 2022-23} & \\ &= (269 / 300) \times 100 = 89.66 \% \end{aligned}$$
