CERTIFICATE

This is to certify that the Mini Project entitled **"AIRLINE RESERVATION SYSTEM"** has been successfully completed by

AMRUTH P S   **4AL20IS004**

GARY RICHARDS   **4AL20IS019**

in the partial fulfillment for the award of Degree of Bachelor of Engineering in Information Science and Engineering of the Visvesvaraya Technological University, Belagavi during the year 2022-2023. It is certified that all corrections/suggestions indicated have been incorporated in the report. The Mini project report has been approved as it satisfies the academic requirements in respect of Mini Project Work prescribed for the award of Bachelor of Engineering Degree.

ABSTRACT

In today's world transportation is a necessary system to move from one place to another.Of these the airways is one of the latest and most important modes of transportation.A Airline Reservation System allows the users to have a hassle free experience during reservation and travelling.This helps them to reserve tickets at a much earlier time than the date of travel which helps to save the valuable time of the user.It is also useful for checking the availability of seats in a aeroplane so that the user can plan their trips accordingly.Moreover it also helps the user to understand the aeroplane timings and adjust according to their plans and needs.This project gives us an idea how the system is updated inorder to meet the user needs.
