CHAPTER-1

INTRODUCTION

1.1 INTRODUCTION

The Staff Management System or SMS is a basic necessity of Educational establishments or Industries to manage staff data and manage many other staff related data needs in a school. In this c++ staff management system Project, the user can create, display, and Modify the staff records. It is one of the most simple and easiest application for user to use because it provides an easy way perform operation.

1.2 PROBLEM STATEMENT

The project “Staff Management” is used for maintaining information for each and every Staff. Each and every staff has own personal details. Before storing the details of staff, the administrator gathering necessary information about the staff. The administrator Manager software is a web-based application that is designed to be implemented for schools, colleges of any size(scale). The software product will automate the major staff operations.

Functionality will be described in detail in section 2-Overall Description. There are two end users for the HMS. The end users is the administrator.

1.3 OBJECTIVE OF THE PROJECT

The project is a staff details application . The aim of our project is to store the details of staff. The application will provide a interface such a way that administrator can access it easily.
