ABSTRACT

Doctor Appointment Booking system, which helps patient to book appointment in easier way. The main advantage of this project is to save patient's time. Doctor can see their patient appointment, once they login.

Patient can call for appointment or message for appointment or book for appointment, when the patients register using their details, then they can login and book for appointment. User login is given for both patient and doctor.

Patient must register and then they can login and doctor have their Id and password to login. The main objective of the doctor appointment booking system is to manage the details of doctor, patient, test, medicine, booking number. It manages all the information about doctor appointment, booking number doctor. The project is totally built at administrative end and then only the administrator is guaranteed the access.

The purpose of the project is to build an application program to reduce the manual work for managing the doctor, patient, Appointment, test. It tracks all the details about the test, medicine, booking number.
