ABSTRACT

The Employee Record Management System is an advanced software solution designed to streamline and automate various administrative and academic processes within a college or university. This system serves as a comprehensive platform that integrates multiple modules, enabling efficient management of employee's information, faculty details, course schedules, examinations, and various other aspects of college operations. The primary objective of the Employee Management System is to enhance list of records, reduce manual paperwork, and improved information and modification of the records, including faculty members, and there basic salary. By leveraging technology, this system provides a centralized database where relevant data can be securely stored, accessed, and managed. Key features of the employees Management System include Employee enrollment and registration, age, basic salary of the employee.
