ACKNOWLEDGEMENT

I would like to express my heartfelt gratitude to several individuals whose invaluable support and guidance have been instrumental in the successful completion of this independent project. Their contributions have been indispensable, and I wish to extend my sincere thanks to them.

First and foremost, I would like to thank Dr. Peter Fernandez, the Principal of AIET, Moodbidri, for providing me with the opportunity to undertake this project and I would also like to extend my appreciation to Mrs. Priya Sequeira, the Head of the MBA Department at Alva's Institute of Engineering and Technology, Mijar.

However, my most profound gratitude goes to my project guide, Mrs. Harshitha V Shetty, Assistant Professor, PG Department of Business Administration, Alva's Institute of Engineering and Technology, Mijar. Her expertise, dedication, and unwavering support have been instrumental in shaping this project. Her insightful feedback, patience, and encouragement have been a constant source of motivation for me.

I would also like to express my appreciation to all the faculty members, friends, and family who have supported me during this endeavour. Their encouragement and belief in my abilities have been a significant driving force.

Finally, I would like to thank everyone who played a part, however small, in this project's successful completion. Everyone's support has been invaluable, and I am grateful beyond words.

EXECUTIVE SUMMARY

The research study titled "A Comparison of Indian Treasury Bills with Other Fixed-Income Securities" aims to analyze and assess the relative performance and attractiveness of Indian Treasury Bills in comparison to other fixed-income securities available in the Indian financial market. This executive summary provides a concise overview of the key findings and implications of the study. The study begins by introducing the significance of fixed-income securities in investment portfolios, highlighting the role of Treasury Bills as a safe and liquid option. It emphasizes the need for investors to make informed decisions in selecting the most suitable fixed-income securities for their investment goals.

The research methodology employed involves the collection and analysis of historical data on Indian Treasury Bills and other fixed-income instruments, including government bonds, corporate bonds, and fixed deposits. Various financial metrics such as yield to maturity, risk-adjusted returns, liquidity, and tax implications are considered to compare these securities.

In summary, this research study provides valuable insights into the comparative performance of Indian Treasury Bills with other fixed-income securities. It serves as a useful resource for investors, financial advisors, and policymakers to make informed decisions regarding fixed-income investments in the Indian market.
