AN ACTIVITY ON "PLASTIC WASTE MANAGEMENT"

This report is intense to brief about Plastic Waste Activity. The Plastic Waste Activity program was initiated and performed by AIET and cadets of NCC AIRWING FLT-B. NCC cadets had taken the initiative to make

this camp successful which included programs like distribution of handmade paper bags and pledges. The main motto of this camp was to create awareness at the local market and to small vendors not to use plastic bags and bring awareness about the environmental issues that are being produced by humans which is affecting the whole environment and ecosystem.

Plastic Waste Activity. As part of its social commitments. Everyone needs to be aware of the Environmental issues that are being produced by plastic which is harmful to the entire ecosystem and this may affect the future generations so we must protect the environment for our future generations.

Outcome: It is evident that a comprehensive approach to plastic waste management is essential. This approach should encompass reducing single-use plastics, promoting recycling and reuse, implementing effective waste collection and disposal systems, and encouraging responsible consumption. It also calls for increased research and development into sustainable materials and technologies.

Ultimately, the success of plastic waste management lies in the hands of individuals, communities, businesses, and governments working together. By raising awareness, adopting sustainable practices, and supporting policies that prioritize environmental protection, we can pave the way towards a cleaner, healthier, and more sustainable future. Plastic Waste Management Day serves as a reminder of our shared responsibility to tackle this issue head-on and to take concrete steps towards a plastic-free world.

To,

The Head of the Department

Sir,

With the permission of Principal-AIET, NCC Air-wing is organizing a "blood donation camp" on 25.11.2023. In view of this NCC volunteers will be visiting all the classrooms at your department to collect the interested blood donors' details. The count will help in inviting more than one blood bank.

It is therefore requested that permission may kindly be granted to visit the classroom

Thanks and regards,

“BLOOD DONATION CAMP”

The honorable guest of this blood donation camp was Commanding officer Wing commander Chandan Garg and PA staff JW Rana . Around 100 NCC cadets had taken initiative to make this camp successful. The main motto of this camp was to create importance of blood donation among the students .

Blood donation is a vital aspect of healthcare systems worldwide, contributing significantly to the well-being of countless individuals. Blood donations are crucial for patients undergoing surgeries, trauma victims, cancer patients, and individuals with various medical conditions like anaemia or thalassemia. Donated blood is a lifeline for those in need. Blood reserves are essential during natural disasters, accidents, and emergencies. Having an adequate blood supply can make the difference between life and death in such situations. Blood components like red blood cells, platelets, and plasma are used in the treatment of numerous medical conditions, including leukaemia, haemophilia, and burns. The Blood Donor Individuals must meet specific eligibility criteria, including age, weight, and general health, to donate blood. Donors are assessed for health issues, and their medical history is reviewed to ensure the safety of both donors and recipients.

Outcome: The blood banks collected a total of 350 units of blood, which might save hundreds of lives and improve the efficiency of healthcare systems. Volunteers learned human values, civic awareness, and social commitment, as well as their roles and responsibilities.

AN ONLINE SEMINAR ON “WORLD WILDLIFE DAY”

The activity was conducted by the NCC cadets of 6 KAR AIR SQN NCC to brief about World Wildlife Day on 3 Mar 2023. The event was an online seminar on wildlife and its conservation followed by a quiz for all the cadets of flights A, B and C. A total of 70 students participated in the quiz from all the 3 flights. The event intended to bring awareness among the cadets about wildlife and their conservation. Through the seminar they would gain knowledge about the wildlife where they exist, what is their habitat and so on. Knowing about all the wildlife would enlighten them to do better with the wildlife. The senior cadets of Flight B took the initiative to educate their co-cadets of the unit about World Wildlife Day through a brief seminar where they explained various wildlife species, their existence, their specialities and which species are endangered can be taken to preserve and protect the wildlife and the habitat. The quiz was conducted based on the World Wildlife Day and a total of 71 cadets participated in the quiz making it a grand success.

Outcome: The seminar on Wildlife Day was a significant step toward fostering a greater understanding of wildlife conservation issues and generating concrete actions for the protection of our planet's biodiversity. We look forward to continued collaboration and efforts to preserve our natural heritage.

To,
The Head of the Department

Sir,

With the permission of Principal-AIET, NCC Air-wing is organizing a "blood donation camp" on 05.04.2023. In view of this NCC volunteers will be visiting all the classrooms at your department to collect the interested blood donors' details. The count will help in inviting more than one blood bank.

It is therefore requested that permission may kindly be granted to visit the classroom

Thanks and regards,

“BLOOD DONATION CAMP”

Blood donation is a vital aspect of healthcare systems worldwide, contributing significantly to the well-being of countless individuals. Blood donations are crucial for patients undergoing surgeries, trauma victims, cancer patients, and individuals with various medical conditions like anaemia or thalassemia. Donated blood is a lifeline for those in need. Blood reserves are essential during natural disasters, accidents, and emergencies. Having an adequate blood supply can make the difference between life and death in such situations. Blood components like red blood cells, platelets, and plasma are used in the treatment of numerous medical conditions, including leukaemia, haemophilia, and burns. The Blood Donor Individuals must meet specific eligibility criteria, including age, weight, and general health, to donate blood. Donors are assessed for health issues, and their medical history is reviewed to ensure the safety of both donors and recipients. There are two primary types of blood donation: whole blood and specific components (e.g., red blood cells, platelets, plasma). Donors typically give about one pint of whole blood. Donors are provided with refreshments to replenish fluids and nutrients. They are monitored to ensure they are feeling well before leaving the donation site.

Outcome: The blood banks collected a total of 271 units of blood, which might save hundreds of lives and improve the efficiency of healthcare systems. Volunteers learned human values, civic awareness, and social commitment, as well as their roles and responsibilities.
