Department of Artificial Intelligence & Machine Learning

CIRCULAR dated 2nd Dec, 2022

All the students of **2nd and 3rd year** of **Artificial Intelligence and Machine Learning** department are informed to attend the following **Technical talk session** on **08th Dec, 2022, 9:30 am**. The following resource person will be delivering you the eminent talks on the below mentioned topic.

Resource Person: **Mr Rohith Kamath.**

Topic: **Supply Chain Management technical session.**

Everyone's presence & co-operation in this regard is highly expected.

Report on "Supply Chain Management"

Department of Artificial Intelligence and Machine Learning organize a technical talk on **Supply Chain Management** on **8ᵗʰ December 2022** at MBA seminar hall, AIET campus, Moodbidre.

Mr. Rohith Kamath is a hands-on, dedicated professional with an in-depth understanding of **supply chain, logistics, operations, and technology, and their inter relationships**. Strategic vision combined with tactical execution Rohith as a proven track record of delivering results for the past **5**+years. Strong functional experience in warehousing, process re-engineering, demand planning.

He started with what is supply chain management, Supply-chain management has been defined as the "design, planning, execution, control, and monitoring of supply chain activities with the objective of creating net value, building a competitive infrastructure, leveraging worldwide logistics, synchronizing supply with demand and measuring performance globally.

He then explained the functionalities of supply chain - Supply-chain management is a cross-functional approach that includes managing the movement of raw materials into an organization, certain aspects of the internal processing of materials into finished goods, and the movement of finished goods out of the organization and toward the end consumer. As organizations strive to focus on core competencies and become more flexible, they reduce ownership of raw materials sources and distribution channels.

DEPARTMENT OF AIRTIFICIAL INTELLIGENCE & MACHINE LEARNING

Rohith , then spoke about the sustainability and social responsibility in supply chain and in the end he explained what are the roles of supply chain professionals to our students like Supply chain professionals play major roles in the design and management of supply chains. In the design of supply chains, they help determine whether a product or service is provided by the firm itself (insourcing) or by another firm elsewhere (outsourcing). In the management of supply chains, supply chain professionals coordinate production among multiple providers, ensuring that production and transport of goods happen with minimal quality control or inventory problems.
