

## **QUALITY INDICATOR FRAMEWORK (QIF)**

### **4.2.1: The library is automated using an Integrated Library Management System (ILMS)**

The library is put to optimal use and is the place of dissemination of knowledge through both traditional and modern methods at the institute. Integrated Library Management System (ILMS) is an application software as a part of library automation.

EASYLIB Web Version 6.4a is fully automated right from indenting of books, procurement and also it is equipped with RFID technology. The RFID enables to issuing, and renewal of books, maintaining the database of books, journals, and periodicals, and maintaining the data of students and faculty who utilize the library resources.

New upgraded software OPAC Module helps to view library collection, further users can check profiles like book due details, transaction statements, and reservation of books, etc. on campus or remotely.
