

PROJECT REPORT ON
“A STUDY ON ASSESSING MOBILE OBSOLESCENCE IN THE
CONTEXT OF A CIRCULAR ECONOMY: ENVIRONMENTAL
IMPACTS AND SUSTAINABLE SOLUTIONS”

Submitted by
SAMYAK JAIN
4AL22BA081

Submitted to

VISVESVARAYA TECHNOLOGICAL UNIVERSITY, BELGAVI
In partial fulfilment of the requirement for the award of the degree of
MASTER OF BUSINESS ADMINISTRATION

Under the guidance of

INTERNAL GUIDE

Mrs. Priya Sequeira

HOD

PG Dept of Business Administration
Alva's Institute of Engineering and Technology,
Mijar – 574225

ALVA'S INSTITUTE OF ENGINEERING AND TECHNOLOGY
MIJAR, MOODBIDRI
MAY-2024

Date: 09/09/2024

CERTIFICATE

This is to certify that **Samyak Jain** bearing USN 4AL22BA081, is a bonafide student of Master of Business Administration course of Alva's Institute of Engineering and Technology, Moodbidri for the batch 2022-2024, affiliated to Visvesvaraya Technological University, Belagavi. The Project report on "A Study on Assessing Mobile Obsolescence in the Context of a Circular Economy: Environmental Impacts and Sustainable Solutions" is prepared by her under the guidance of Mrs. Priya Sequeira, Associate Professor, in partial fulfilment of the requirements for the award of the degree of Master of Business Administration of Visvesvaraya Technological University, Belagavi, Karnataka.

DECLARATION

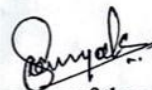

I, Mr. Samyak Jain, USN: 4AL22BA081 hereby declare that the project report entitled "A Study on Assessing Mobile Obsolescence in the Context of a Circular Economy: Environmental Impacts and Sustainable Solutions" prepared by me under the guidance of Mrs. Priya Sequeira, HOD, PG Dept. of Business Administration, Alva's Institute of Engineering and Technology.

I also declare that this project work is towards the partial fulfilment of the university regulations for degree of MASTER OF BUSINESS ADMINISTRATION by Visvesvaraya Technological University, Belgaum.

I have undergone a project for a period of six weeks. I further declare that this project is based on the original study undertaken by me and has not been submitted for the award of any degree/diploma from any other University/Institution

Date: 20-09-2024

Place: Mjjar

signature of the student

ACKNOWLEDGEMENT

I wish to convey my gratitude to my internal guide Mrs. Priya Sequeira, HOD, PG Department of Business Administration, for having guided me on every aspect right from the beginning of the project report for giving resources and valuable insights about the topic which is very crucial to study and prepare the project report.

My thanks to Dr. Peter Fernandes, Principal of Alva's Institute of Engineering and Technology for his wholehearted support in all our endeavours.

I express my genuine thanks to the teaching faculties and the support staff of PG Department of Business Administration, Alva's Institute of Engineering and Technology, Mijar, Moodbidri.

I express my deepest gratitude to my parents and family members for their active role in my professional development without which my higher studies would have just been a dream.

Finally, I thank my friends for their valuable suggestions to complete this study successfully.

With Sincere Regards,

Samyak Jain

4.40.2	Chart showing suggestions for manufacturers to make phones more repair-friendly	79

Executive Summary

The project examines the critical issue of mobile phone obsolescence and its environmental impacts in coastal Karnataka, specifically in Dakshina Kannada and Udupi districts. Rapid advancements in mobile technology have led to frequent device upgrades, resulting in a significant increase in electronic waste (e-waste). This accumulation poses serious environmental risks, including the release of toxic substances that can harm ecosystems and human health. The study emphasizes the need for a circular economy, which promotes extending product lifecycles through reuse, repair, refurbishing, and recycling. This approach aims to reduce the environmental footprint of the mobile industry and enhance resource efficiency.

To gather insights, structured surveys were conducted among mobile users and repair shops to assess consumer behavior regarding mobile phone usage, disposal methods, and awareness of recycling programs. The findings reveal that consumers are increasingly aware of the environmental impacts of e-waste and express a desire for sustainable practices, such as improved repairability and better access to spare parts. The research highlights the vital role of mobile repair shops in extending device lifecycles and advocates for collaboration among stakeholders, including manufacturers, repair businesses, and consumers. Additionally, it calls for educational initiatives to inform consumers about the benefits of repairing devices and participating in recycling programs.

In conclusion, the project underscores the urgent need to address the environmental challenges associated with mobile phone obsolescence. By promoting a circular economy approach, it offers actionable recommendations for reducing e-waste and improving sustainability in mobile phone management, contributing to a more sustainable future for technology and the planet.
