#### CIRCULAR

Sir/ Madam.

Subject: Clarification of 2021 scheme Industry/Research Internship (21INT82) regarding

Reference: VTU/BGM/BoS/598/2024-25/1813, Dated 23.07.2024

Based on the queries received, the following points are clarified for the (21INT82) Industry/Research Internship:

- 1. According to the teaching and examination scheme, the Technical Seminar (21SEM81) and Industry/Research Internship (21INT82) are scheduled for the eighth semester, while the Project Work (21PROJ76) and other theory courses (21xx71 to 21xx75X) are in the seventh semester.
- 2. Industry /Research Internship duration is 15 weeks as per 178th EC proceedings
- 3. According to the scheme, the seventh and eighth semesters are interchangeable (Swappable). In the ODD semester, 50% of the final-year students can choose to take eighthsemester courses (technical seminar and internship), while the remaining students can take project work along with the theory courses of the seventh-semester. In the EVEN semester, the roles are reversed.
- 4. This swapping arrangement is designed to ensure that all students have the opportunity to participate in an internship. However, students who do not secure an internship can instead take Skill Enhancement Courses (SEC), which have credits totalling to those of the internship. The SECsare available @ online.vtu.ac.in.
- 5. Guidelines for Internship are mentioned in Annexure-IV (Activities under Internship) which is made available @ https://vtu.ac.in/pdf/regulations2021/anex4.pdf

Please note that the college must inform the Registrar (Evaluation) about the details of the students who are taking seventh-semester courses, those taking eighth-semester courses, and those opting for Skill Enhancement Courses (SEC) in the upcoming semester. These details must reach the Registrar (Evaluation) office within 10 days of the start of the odd semester.

All principals of affiliated or constituent engineering colleges and chairpersons of university departments are hereby informed to update these details for all concerned faculty and students...

DATE:

3 JUL 2024

Dear Sir/ Madam

Subject: 2021 scheme Industry Internship /Research Internship (21INT82):

CIRCULAR

Regarding Reference:

Joint Board of Studies recommendation vide proceeding no. 01(g) meeting dated:

Proceeding number 2.2 1 of 178th EC meeting dated 17.07.2024

VTU/BGM/Aca/BoS/2023/257, Dated: 10.04.2023

4. Dean Faculty of Engineering approval dated: 22.07.2024

5. Hon'ble Vice-Chancellor's approval Dated: 23.07.2024

This refers to the subject mentioned earlier, based on the recommendation of the Joint Board of Studies and approval by the EC of VTU, Belagavi, the duration of the Industry Internship/Research Internship (21INT82) under the 2021 scheme has been fixed to 15 weeks. The institute has the flexibility to interchange(swap) the internship between 7th and 8th semesters based on the total number of students, and the availability of internships (the colleges shall assist in getting internships to the students). This 15-week semester duration will help students to complete their academic requirements on time. The students have to follow the rules and guidelines for the Industry Internship/Research which made available Internship (Annexure-IV Under Activities https://vtu.ac.in/pdf/regulations2021/anex4.pdf Internship).

- An industry or research internship should be conducted under the supervision of a faculty mentor or guide (refer to clause 1.3 of Annexure IV: Activities Under Internship, page 06). The mentor or guide is responsible for assisting students in securing appropriate industry internships and ensuring that they acquire the necessary skills to benefit their future careers.
- Students undertaking internships must maintain a daily diary (internship report)
  as specified in Annexure IV (Activities under Internship).
- The faculty mentor or guide must adhere to the guidelines provided for the conduct of CIE and SEE. Additionally, they are responsible for guiding the intern

h

to ensure the smooth execution of the internship and the preparation of the internship report (daily diary).

- 4. The mentor/guide/college shall submit all related documents to the University whenever requested.
- 5. For an industry internship, the intern must adhere to all the safety regulations of the internship provider. Any deviation from these safety norms and the resulting consequences are solely the responsibility of the intern (student).
- 6. With the consent of the internal guide and Principal of the Institution, students shall be allowed to carry out the internship within or outside the state or abroad, provided favorable facilities are available for the internship and the student remains regularly in contact with the internal guide.
- 7. University shall not bear any cost involved in carrying out the internship by students. However, students can receive any financial assistance extended by any organization.
- 8. As in the reference point number 03, students who are unable to secure an internship must take SKILL ENHANCEMENT COURSES, with credits totaling the same as those of the internship. Students are required to enroll in and complete Skill Enhancement Courses available at (https://online.vtu.ac.in/ category/courses/Skill-Enhancement-Course).

All the principals of autonomous/affiliated/constituent engineering colleges are hereby informed to bring the content of the circular to the notice of the Mentor/Guide for internship and the concerned students.

Dear J Karthikeyan,

We are delighted to offer you employment with Morae Services India Private Limited ("Company") as a(n) Analyst at the Company's office at Block C-4, ELM Building, SEZ, Manyata Embassy Business Park, Nagavara, Bengaluru, Karnataka 560045, India.

With effect from your date of joining, your employment will be governed by the terms and conditions referred to in Annexure Land prevailing policies and procedures of the Company.

Your annual salary will be INR 5,50,000 (Rupees Five Lakhs Fifty Thousand only), subject to deduction of applicable tax. The remuneration and perquisites are detailed in Annexure II.

This offer of employment will expire in one (1) business day from the date of this letter ("Offer Letter"). Any acceptance postmarked or otherwise communicated after this date will be considered invalid.

This offer is contingent upon the positive completion of the background verification report and is valid upon joining before or on the first day ("Commencement Date").

We ask that on your commencement date of 11-Mar-2024, you report to the Company's office mentioned above. In the event you are unable to do so and have not communicated to the Company before the Commencement Date, this offer shall be withdrawn.

The terms of this letter and Annexures are strictly confidential and should be kept between you and the Company.

Should you have any questions, please let us know. We look forward to welcoming you to the Morae team.

Sincerely,

For Morae Services India Private Limited

Subject Internship

Dear Nisarga P R,

In reference to your mail, we would like to congratulate you on being selected for internship with Amiti Software Technologies Pvt Ltd based at Bangalore. You will be reporting to Mr. Srikanth Talapadi. Your training is scheduled to start effective 10th Feb, 2024 to 20th Apr, 2024. Your Training will be in Software Development department and area will be Front End / JavaScript Technologies.

As such, your internship will include training and focus primarily on learning and developing new skills and gaining a deeper understanding of concepts through hands-on application of the knowledge you learned in class. The project details and technical platform will be shared with you on or before commencement of training. During the internship you are not allowed to disclose any company information without prior permission from your mentor.

Again, congratulations and we look forward to working with you.

Yours faithfully,

Amiri Saftware Technologies Pvt. Ltd.

Director

Srikanth Talapadi,

## Letter of Undertaking Given By Parents for Internship

We, th	e undersigned parents/gu	ardian shall ensure that our son/daughter 1/16	saige PR
USN_	MAL20C5086	_ shall abide by the college terms and conditions	s for internship.

We, the undersigned parents/guardian hereby declare and confirm that the institution shall not be held responsible in the event of any misfortune or accidents and/or personal injuries whether fatal or otherwise involving our son/daughter.

We, the undersigned parents/guardian shall indemnify and keep indemnified the institution against any liability, demand, claim, loss or lawsuit in respect of personal injuries to our son/daughter and/or to anybody and/or property damage arising out of or caused by our son/daughter's negligent act or omission during the course of industrial training.

We, the undersigned parents/guardian shall ensure that our son/daughter uphold the good name of the institution and abide by the code of conduct of the Institution and the industry and any other relevant rules and regulations at all times during the course of internship.

We, the undersigned parents/guardian further confirm that the Institution shall not be held responsible for our sor/daughter misconduct or wrong doing at all times during the course of internship.

#### **ACKNOWLEDGEMENT**

The satisfaction and euphoria that accompany the completion of any talk would be incomplete without mention of the people who made it possible, whose constant guidance and encouragement ground my efforts with my success. I consider it is a privilege to express my gratitude and respect to all those who guided me in completion of Internship.

Its great privilege to place on record my deep sense of gratitude to the management and **Dr. Peter Fernandes**, Principal, Alva's institute of Engineering and technology patronized throughout our career & for the facilities provided to carry out this work successfully.

Its great privilege to place on record my deep sense of gratitude to **Dr. Siddesh G K**, Professor and Head, Dept. of Electronics and communication Engineering. Alva's institute of Engineering and technology, who patronized throughout our career & for the facilities provided to carry out this work successfully.

I am grateful to my guide **Prof. Bhagyashree K**, Assistant Professor, Department of ECE, Alva's Institute of Engineering and Technology, Mijar.

I thank all the teaching and non-teaching staff members who have helped me directly or indirectly in the Internship.

Finally, I also thank my family and friends for their co-operation and motivation to complete this Internship successfully.

#### INTRODUCTION

## 1.1 About the organization

QSpiders is a leading software testing and development training institute with branches across India. It was founded by Mr. Prakash Francis in 2007, with the aim of providing high-quality training to students and professionals in the software testing and development fields. QSpiders has trained more than 1,50,000 students so far and is recognized as one of the best training institutes in the country. QSpiders has a team of highly skilled trainers who are experts in their respective domains. The trainers are well-versed in the latest technologies and industry trends and provide practical, hands-on training to students. The institute offers courses in software testing, software development, and other related domains. The courses are designed to provide students with a strong foundation in the subject and to prepare them for real-world challenges. The institute has state-of-the-art infrastructure, with well-equipped labs, classrooms, and training facilities. The labs are equipped with the latest hardware and software, and provide students with a hands-on learning experience. The classrooms are spacious and well-lit, and provide a comfortable learning environment for students. The training facilities are designed to provide a conducive environment for learning, with all the necessary amenities

QSpiders has tie-ups with leading companies in the software industry and provides placement assistance to students. The institute has a dedicated placement team that works with students to help them secure job placements. The placement team also conducts mock interviews, resume-building workshops, and other activities to prepare students for the job market. QSpiders has also been committed to providing placement assistance to their students. They have a dedicated placement cell that helps students with job placements after completing their training programs. The placement cell has tie-ups with leading IT companies in India, and they regularly conduct placement drives for their students.

In summary, QSpiders has come a long way since its inception in 2001. From humble beginnings, it has grown to become one of the most reputed software testing training institutes in India. With its commitment to quality training, state-of-the-art infrastructure, and dedicated placement cell, QSpiders is poised to continue its success in the years to come.

#### BASICS OF C- PROGRAMMING

# 2.1 Brief history of C

C is a general-purpose programming language which features economy of expression, modern control flow and data structures, and a rich set of operators. C is not a "very high level" language, nor a "big" one, and is not specialized to any area of application. But its absence of restrictions and its generality make it more convenient and effective for many tasks than supposedly more powerful languages. The history of C programming language is quite interesting. C was originally designed for and implemented on the UNIX operating system by Dennis Ritchie. C is the result of a development process that started with an older language called (BCPL) Basic Combined Programming Language. BCPL was developed by Martin Richards, and it influenced a language called B, which was invented by Ken Thompson. B led to the development of C in the 1970s. For many years, the de facto standard for C was the version supplied with the UNIX operating system. In the summer of 1983, a committee was established to create an ANSI (American National Standards Institute) standard that would define the C language. The standardization process took six years (much longer than anyone reasonably expected).

#### 2.2 Constants and Variables in Clanguage

As the name suggests the name constants is given to such variables or values in C programming language which cannot be modified once they are defined. They are fixed values in a program. There can be any types of constants like integer, float, octal, hexadecimal, character constants etc. Every constant has some range. The integers that are too big to fit into an int will be taken as a long. Now there are various ranges that differ from unsigned to signed bits. Under the signed bit, the range of an int varies from -128 to +127 and under the unsigned bit, int varies from 0 to 255.

## DATA STRUCTURE & ALGORITHUM

## 3.1 INTRODUCTION

The DSA stands for "Data Structures and Algorithms." Data Structure is a way of collecting and organizing data in such a way that can perform operations on these data in an effective way. Data Structures is about rendering data elements in terms of some relationship, for better organization and storage. For example, have some data which has player's name "Virat" and age 26. Here "Virat" is of String data type and 26 are of integer data type. An algorithm is a finite set of instructions or logic, written in order, to accomplish a certain predefined task. Algorithm is not the complete code or program, it is just the core logic (solution) of a problem, which can be expressed either as an informal high-level description as pseudocode or using a flowchart. As data structure is a scheme for data organization so the functional definition of a data structure should be independent of its implementation. The functional definition of a data structure is known as ADT (Abstract Data Type) which is independent of implementation. The way in which the data is organized affects the performance of a program for different tasks. Computer programmers decide which data structures to use based on the nature of the data and the processes that need to be performed on that data. Some of the more commonly used data structures include lists, arrays, stacks, queues, heaps, trees, and graphs.

## 3.2 Classification of Data Structures

Data structures can be classified as

- Simple data structure
- Compound data structure
- Linear data structure
- Nonlinear data structure

#### CORE JAVA

# 4.1 History of Java

James Gosling initiated Java language project in June 1991 for use in one of his many acts top box projects. The language, initially called 'Oak' after an oak tree that stood outside Gosling's office, also went by the name 'Green' and ended up later being renamed as Java, from a list of random words. Sun released the first public implementation as Java 1.0 in 1995. It promised Write Once, Run Anywhere, providing no-cost run-times on popular platforms. On 13 November, 2006, Sun released much of Java as free and open-source software under the terms of the GNU General Public License (GPL). On 8 May, 2007, Sun finished the process, making all of Java's core code free and opensource, aside from a small portion of code to which Sun did not hold the copyright.

### 4.2 INTRODUCTION

Java is one of the programming language or technology used for developing web applications. Java language developed at SUN Micro Systems in the year 1995 under the guidance of James Gosling and their team. Originally SUN Micro Systems is one of the Academic universities (Standford University Network) Whatever the software developed in the year 1990, SUN Micro Systems has released on the name of oak, which is original name of java (scientifically oak is one of the tree names). The OAK has taken 18 months to develop. The oak is unable to fulfill all requirements of the industry. So, James Gosling again reviews this oak and released with the name of java in the year 1995. Scientifically java is one of the coffee seed names. Java is a platform independent, more powerful, secure, high performance, multithreaded programming language. Here we discuss some points related to java.

Java divided into three categories; they are.

- J2SE (Java 2 Standard Edition): J2SE is used for developing client-side applications.
- J2EE (Java 2 Enterprise Edition): J2EE (Java 2 Enterprise Edition)

#### HTML

# 5.1 INTRODUCTION

HTML stands for Hypertext Markup Language, and it is the most widely used language to write Web Pages.

- Hypertext refers to the way in which Web pages (HTML documents) are linked together. Thus, the link available on a webpage is called Hypertext.
- As its name suggests, HTML is a Markup Language which means you use HTML to simply "mark-up" a text document with tags that tell a Web browser how to structure it to display.

Originally, HTML was developed with the intent of defining the structure of documents like headings, paragraphs, lists, and so forth to facilitate the sharing of scientific information between researchers.

#### 5.1.1 Basic HTML Document

```
<!DOCTYPE html>
<html>
<head>
<title>This is document title</title>
</head>
<body>
<h1>This is a heading</h1>
Document content goes here....
</body>
</html>
```

Fig 5.1: Basic HTML template

Either you can use Try it option available at the top right corner of the code box to check the result of this HTML code, or let us save it in an HTML file test.htm using your favorite text

#### CSS

# 6.1 INTRODUCTION

Cascading Style Sheets, fondly referred to as CSS, is a simple design language intended to simplify the process of making web pages presentable. CSS handles the look and feel part of a web page. Using CSS, you can control the color of the text, the style of fonts, the spacing between paragraphs, how columns are sized and laid out, what background images or colors are used, as well as a variety of other effects. CSS is easy to learn and understand but it provides a powerful control over the presentation of an HTML document. Most commonly, CSS is combined with the markup languages HTML or XHTML.

#### 6.2 Advantages of CSS

- CSS saves time You can write CSS once and then reuse the same sheet in multiple
  HTML pages. You can define a style for each HTML element and apply it to as many
  web pages as you want.
- Pages load faster If you are using CSS, you do not need to write HTML tag attributes
  every time. Just write one CSS rule of a tag and apply it to all the occurrences of that
  tag. So, less code means faster download times.
- Easy maintenance To make a global change, simply change the style, and all the elements in all the web pages will be updated automatically.
- Superior styles to HTML CSS has a much wider array of attributes than HTML, so
  you can give a far better look to your HTML page in comparison to HTML attributes.
- Multiple Device Compatibility Style sheets allow content to be optimized for more than one type of device. By using the same HTML document, different versions of a website can be presented for handheld devices such as PDAs and cellphones or for printing.
- Global web standards Now HTML attributes are being deprecated and it is being recommended to use CSS. So, it is a good idea to start using CSS in all the HTML pages to make them compatible with future browsers.

### **APPENDIX**

## PROUDLY PRESENTED TO:

RAMYA . K

For the successful completion of 45 days of Internship the topic "Java/Python Full Stack Program Development, Data Structures & Algorithms, Artificial Intelligence & Machine Learning, Aptitude and Soft Skill Training conducted by Training & Assessment Partners and IIIT Allahabad during March/April and August 2023.

Head - Training and Rocements
