# SERVICES

We provide technology services by defining, designing and building Desktop, Web and Android applications tailored to meet your business requirements.

## Desktop Application

We design and develop Desktop applications that are tactically valuable, risk redundant and maintainable. Our applications smooth the progress of enhancements that are modular to upgrades or changes . Our Desktop Applications development spans several platforms and languages like .NET and VB6. System Integration provides cutting edge desktop development services to transform your company.

Desktop Application Development Applying our industry expertise and technical experience, we develop Desktop Applications that tone-down the complexity of your business processes, improve your performance and accelerate your business productivity. By making complicated and tedious operations simpler, our Desktop Applications help you synchronize important processes and streamline your IT operations in a proper, growth-enhancing manner.

## Web Development

We offer services to develop and maintain all types of web applications for financial services, retail sector, E-Commerce sites and several trending domains.

Services provided by us for web development are able to meet our clients requirement and their requirement.

Royal Infotech delivers solution to meet your business requirements. Our Web Applications development spans several platforms and languages like HTML5, PHP, Javascript, CSS and MySQL on the back-end.

## Android Development

Our mobile application Helps businesses to create crisp, creative applications that offer their customers an interactive and innovative user experience on Android devices.

The Android platform offers a wide variety of options for Android Application Development. With today's technology advances, the android operating system in combination with system flexibility and high speed

## connectivity

can be used to build advanced mobile applications. As the android operating system is being widely adopted by organizations across the globe Royal Infotech is well placed with its cumulative years of experience and expertise in the field of mobile application development and design to create an application that is just the right fit for you.
