# Google Cybersecurity

Those who earn the Google Cybersecurity Certificate have completed eight courses, developed by Google, that include hands-on, practice-based assessments and are designed to prepare them for entry-level roles in cybersecurity. They are competent in beginner-level Python, Linux, SQL, Security Information and Event Management (SIEM) tools, and Intrusion Detection Systems (IDS). They know how to identify common cybersecurity risks, threats, and vulnerabilities, as well as the techniques to mitigate.

**Sound the Alarm: Detection and Response**

**Automate Cybersecurity Tasks with Python**

**Put It to Work: Prepare for Cybersecurity Jobs**

Foundations of Cybersecurity

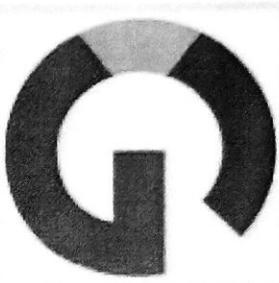

Play It Safe: Manage Security Risks

Connect and Protect: Networks and Network Security

Tools of the Trade: Linux and SQL

Assets, Threats, and Vulnerabilities

**Sound the Alarm: Detection and Response**

The online courses listed in this certificate may allow for material from courses taught on-campus, but not exclusively. Courses are not equivalent to on-campus courses. Participants in this certificate program do not receive an official degree or diploma. This certificate does not confer a license to practice law or any other profession. The holder of this certificate is solely responsible for verifying the legitimacy of the courses.
