Google Career Certificates

Google Cybersecurity

Those who earn the Google Cybersecurity Certificate have completed eight courses, developed by Google, that include hands-on, practice-based assessments and are designed to prepare them for entry-level roles in cybersecurity. They are competent in beginner-level Python-Linux, SQL, Security Information and Event Management (SIEM) tools, and Intrusion Detection Systems (IDS). They know how to identify common cybersecurity risks, threats, and vulnerabilities, as well as the techniques to mitigate.

The online specialization named in this certificate may draw on matchial from courses taught by Campus, but the included courses are not equivalent to on-campus courses. Participation in this byline specialization does not constitute encolinent at this university. This certificate does not confer a University grade, course tradition degree, and it does not verify the identity of the learner.
