## REQUEST TO PROVIDE TRANSPORTATION AND ACCOMMODATION FACILITY TO NDRF TEAM

Sir,

1. With respect to earlier email sent to Commandant, 10 Bn NDRF Dtd on 19 Dec 2020, they accepted our invitation to conduct training program at our Institute from 11 Jan to 13 Jan 2021.
2. In this regard, a transport facility is required to bring the team from Koppa and drop them back to Bangalore (tentative). A bus with seats removable should be sent to pick the team and also to carry training materials.
3. It is requested to transport department to provide bus facility for NCC cadets to reach the training location (details will be provided two days before the commencement of event).
4. It is also requested to provide the support of Journalism department to cover the entire event for print media/digital media.

Thanking you,

Yours' Sincerely

(Parveez Shariff B G)

Flying Officer

## DISASTER MANAGEMENT TRAINING BY NDRF TEAM

Date: 11<sup>th</sup> January 2021 - 13<sup>th</sup> January 2021

TIMINGS: 9000 hrs. – 1700 hrs.

### FOREWORD

This report intends to brief about the training imparted for NCC cadets by NDRF team conducted by 06 KAR AIR SQN NCC Flight B, AIET. A total of 250 cadets of Alva's College were present for this training program which includes the Army Wing, Naval Wing, Air Wing. This training was conducted mainly to educate and create awareness about to handle the situation during the disasters.

### DAY-1:

The program was inaugurated by Sri. Umanath Kotian, MLA of Moodbidri & Mulky in presence of Mr. Vivek Alva, Managing Trustee, AEF, Dr. Peter Fernandies, Principal, AIET, NDRF Team, RRC Bangalore, NCC Officers of Alva's College and NCC cadets.

### Session-1:

The Sub Inspector Praveen Kumar Upadhyia took up the session on the topic MFR (Medical First Responder). Medical First Respondent is very important and crucial task required to be carried out at the spot of accident. If anyone is a trained in MFR he/she can take necessary steps at the spot before

Moodbidri - 574227

6 Kar AIR SQN NCC, Mangalore

ambulance arrives. Thus MFR tells us about the steps that are to be taken before taking the patient to the hospital when an incident takes place.

## MFR (Medical First Responder):

1. He/she mainly does the dots check which is checking whether there is any fractures in the body.
2. Firstly a MFR should seek the permission from the bystander before doing the necessary checks, only if the permission is granted to MFR is supposed to proceed.
3. It is done by two persons where, one checks the victims and the other make a note of injuries in the victim, it is mainly for the reference of the doctor to start the treatment earliest as possible.

NDRF team gave demo on MFR and then asked some of the volunteers to perform MFR practically on the stage and after post lunch Fg Offr Parveez Shariff B G took interest and thought this was very important part of the training and split cadets in buddy pair then asked all to do the MFR training where cadets every practiced.

## Session - 2:

6 Kar AIR SQN NCC, Mangalore

The second session was about bleeding control, soft tissue injury, and muscular skeletal injury. In this session, NDRF team demonstrated how to handle/control the bleeding of person at the time of accident.

1. Clean the wound surface with tincture and cover the wound with different types and ways of tying a bandage, as demonstrated by NDRF team.
2. If the bleeding doesn't stop then direct pressure need to be applied.
3. In case of skeletal injury, NDRF team had demonstrated with different types of bandage techniques with sticks and other props.

## DAY-2:

### Session - 1:

The session started with discussion on Foreign Body Airway Obstruction (FBAO). This session explained about the clearing the airway obstruction and providing oxygen if necessary at the time of incident.

There are 2 types of Choke: -

1. Partial Choke: This happens during eating food and during tongue twist.
2. Complete Choke: If this happens means person will not able to breathe and can die.

FG OFFR PARVEEZ SHARIFF B.G.  
ASSOCIATE NCC OFFICER  
6 KAR AIR SQN NCC MANGALORE  
ALVA'S EDUCATION FOUNDATION (R.)  
MOODBIDRI

# Alva's Air Wing NCC (Flight - B)

Moodbidri - 574227

6 Kar AIR SQN NCC, Mangalore

During this situation, the airway of the patient need to be cleared and provide the oxygen by one of the following methods.

1. Oropharyngeal airway,
2. Bag Valve Mask,
3. CPR mask usage.
4. Equipment's used in oxygen delivery system.

An oropharyngeal airway is a medical device called an *airway adjunct* used to maintain or open a patient's airway. It does this by preventing the tongue from covering the epiglottis, which could prevent the person from breathing. The correct size OPA is chosen by measuring from the first incisors to the angle of the jaw. The airway is then inserted into the person's mouth upside down. Once contact is made with the back of the throat, the airway is rotated 180 degrees, allowing for easy insertion, and assuring that the tongue is secured. An alternative method for insertion, the method that is recommended for OPA use in children and infants, involves holding the tongue forward with a tongue depressor and inserting the airway right side up. Use of an OPA does not remove the need for the recovery position and ongoing assessment of the airway and it does not prevent obstruction by liquids (blood, saliva, food, cerebrospinal fluid) or the closing of the glottis. It can, however, facilitate ventilation during CPR (cardiopulmonary resuscitation) and for persons with a large tongue.

The main risks of its use are:

1. If the person has a gag reflex, they may vomit.

FG OFFR PARVEEL SHARIFF B.G.  
ASSOCIATE NCC OFFICER  
6 KAR AIR SQN NCC MANGALORE  
ALVA'S EDUCATION FOUNDATION (R.)  
MOODBIDRI

# Alva's Air Wing NCC (Flight - B)

Moodbidri - 574227

6 Kar AIR SQN NCC, Mangalore

2. When OPA is too large, it can close the glottis and thus close the airway.

## Bag Valve Mask:

The Bag-Valve-Mask (BVM) apparatus are also known as manual resuscitators and as self-inflating resuscitation systems. The examples include Laerdal, Ambu, Hsiner, Mayo, and Air Viva.

## CRP Mask:

A pocket mask, or pocket face mask or CPR mask, is a device used to safely deliver rescue breaths during a cardiac arrest or respiratory arrest. The specific term "Pocket Mask" is the trademarked name for the product manufactured by Laerdal Medical AS. It is not to be confused with a bag valve mask (BVM).

## Usage:

While a pocket mask is not as efficient as a bag valve mask, it does have its advantages when only one rescuer is available. As suggested by its name, the pocket mask benefits from a somewhat easier portability when compared to the bag valve mask. Also, in contrast to the bag valve mask, which requires two hands to operate (one to form a seal and the other to squeeze the bag), the pocket mask allows for both of the rescuer's hands to be on the patients head. This hand placement provides a

## Session – 2:

The session -2 was the demonstration of lifting and moving the patient. The following are the methods:

### Lifting and moving: -

- Plan your move before lifting.
- Use your legs to lift, not your back.
- Keep the object close to your body.
- Stack move your body as vertical unit.
- Reduce the height from Kneeing down.

### Moving Patients:

There are 2 types of patient moves, they are

- Emergency move.
- No -Emergency move.

Type of Emergency move:

1. Shirt drag.
2. Shoulder drag.
3. Blanket drag
4. Fire fighter drag
5. Piggy back carry
6. Sheet drag
7. Cradle carry
8. Rescuer crutch.

## Session - 3:

The session -3 was on the flood management. The NDRF team had discussed the do's and don'ts to be carried out during flood. A flood is an overflow of water on normally dry ground. This is most commonly due to an overflowing river, a dam break, snowmelt, or heavy rainfall. Less commonly happening are tsunamis, storm surge. The deadliest flooding was in 1931 in China and killed between 2,000,000 and 4,000,000 people. The Kerala flood in India was another flood that has destroyed people's houses.

### Causes of Flood:

Flooding is usually caused when a volume of water within a water body, such as a lake, overflows outside it. Sometimes if a dam breaks, it suddenly releases a large amount of water. The result is that some of the water travels to land, and 'floods' the area. Many rivers are in a channel, between river banks. They flood when the strength of the river causes it to flow beyond the banks. This is more common at bends or meanders. Flood damage can be prevented by moving away from places that flood. However, people have long liked to have their homes and businesses alongside water because water is good for agriculture and transport and in other ways.

### Before the Flood:

1. Stop leakage of Dams.
2. Evacuate the home you are staying.
3. Go to the high peak point areas.
4. Keep first aid kit with you always.

  
FG OFFER PARVEEN  
ASSOCIATE NCC OFFICER  
6 KAR AIR SQN NCC MANGALORE  
ALVA'S EDUCATION FOUNDATION (R.)  
MOODBIDRI

# Alva's Air Wing NCC (Flight - B)

Moodbidri - 574227

6 Kar AIR SQN NCC, Mangalore

5. Use Floating things around you for your help.

## During flood time:

- Switch off home currents.
- Close all doors of home.
- Leave freely to all animals if any tight at one place.

## After Flood:

- Call medical Treatment or any forces nearby.
- Securely remove home doors and get in because there can be thing that can harm you.
- Don't move in any unknown flooded area.
- Dug and bury the dead animals in your surroundings.
- Search for clean water to drink.

## Types of water:

1. Inland water: which is available in rivers, dams, pounds, wells ,etc.
2. Open water: which is found in Sea and Oceans.

## Swimming Techniques:

The NDRF team had taught on different swimming styles and the easy way to swim for the non-swimmers.

### 1. Freestyle swimming:

Also known as the front crawl, this is the classic swimming posture. Lie on your stomach and flutter your legs while alternating the arms in a windmill motion.

2. Backstroke swimming: Lie on your back and flutter your legs while circling your arms in a windmill motion. It's very similar to the freestyle, but you swim on your back and propel yourself backwards.

3. Breaststroke swimming: Float with your stomach facing down, then move your arms in a half-circle motion in front of the body. Bend your legs, then kick back with good timing, and you'll propel yourself up and forward.

ALVA'S EDUCATION FOUNDATION (R.)  
MOODBIDRI

# Alva's Air Wing NCC (Flight – B)

Moodbidri - 574227

6 Kar AIR SQN NCC, Mangalore

4. Sidestroke swimming: Although not one of the official four strokes in competitive swimming, the sidestroke is a great survival technique. This is commonly used by lifeguards because you can hold onto another person and keep them above water while you swim.

## KNOTS:

The NDRF team had taught the technique of tie knots, which will be helpful during the flood management to rescue/evacuate the people. This list of knots includes many alternative names for common knots and lashings. Knot names have evolved over time and there are many conflicting or confusing naming issues. The overhand knot, for example, is also known as the thumb knot. The figure-eight knot is also known as the savoy knot or the Flemish knot.

### Different types of knots:

1. Tight interlacing of two ropes. A knot is also a unit of speed in aviation and marine navigation equal to one nautical mile per hour.
2. Halyard knot: interlacing of ropes used to attach the halyard to a sail.
3. Reef knot: interlacing of ropes made of two half-knots inverse to each other.
4. Bowline: interlacing of ropes with a loop that can be used as support.
5. Two round turns and a half-hitch: interlacing of ropes around an object by making two turns, then a Hal-knot.
6. Two half-hitches: interlacing of ropes around an object by making two half-knots, one after the other.
7. Double shell bend: double interlacing of ropes, used to attach two ropes together.
8. Sheet knot: interlacing of ropes used to attach two ropes together.
9. Figure of eight knot: interlacing of ropes used to finish the end of a rope.
10. Overhand knot: simple interlacing of a rope.

## DAY-3:

It was the last day of the training and was field activity cadets were taken to Mulki backwaters, there NDRF team made three groups one was swimmers, second was non- swimmers and third was SW's who were supposed to learn boat handling. Constable Kanan was handling swimming trainings he has 17 years of experience in swimming and training so this was great opportunity for cadets to learn under him.

At first cadets were made to do exercises in water and on ground then made to enter in the water and made a line of 10 and there were total of 58 cadets in swimming group, Mr. Kannan thought four types of swimming techniques.

### 1. Head up freestyle:

Heads-up freestyle allows you to move around the pool quickly while keeping your face out of the water and have a look at the victim, and save him immediately.

### 2. Head down freestyle:

Head-down freestyle is used to move faster in water and save the victim in emergency.

### 3. Breast stroke:

Breaststroke is a swimming style in which the swimmer is on their chest and the torso does not rotate. It is the most popular recreational style due to the swimmer's head being out of the water a large portion of the time, and that it can be swum comfortably at slow speeds.

### 4. Butterfly stroke:

The butterfly (colloquially shortened to fly) is a swimming stroke swum on the chest, with both arms moving symmetrically. It is the newest swimming style swum in competition, first swum in 1933 and originating out of the breaststroke.

## Ways of rescuing a victim who is drowning in water:

### 1. By Chin Tow:

Use this tow with cooperative or unconscious casualties. It is the easiest tow if you relax the towing arm. Your casualty should be towed behind you, not beside you which would be too much effort. Hold on to the chin, not the throat. Use side stroke or lifesaver's backstroke and don't kick the casualty.

  
FG OFFR PARVEEZ SHARIFF B.O.  
ASSOCIATE NCC OFFICER  
6 KAR AIR SQN NCC MANGALORE  
ALVA'S EDUCATION FOUNDATION (R.)  
MOODBIDRI

# Alva's Air Wing NCC (Flight - B)

Moodbidri - 574227

6 Kar AIR SQN NCC, Mangalore

## 2. By Head tow:

This is another tow for a cooperative casualty. Holding the head gives good control and feels reassuring to the casualty. Only drawback is that you only have your legs to push forward with.

## 3. By Cloth Tow:

The clothes tow is used to help swimmers who are tired but not struggling. The rescuer grabs the clothes on the casualty's back between the shoulders and pulls him to a horizontal position, floating on his back. He maintains his hold of the casualty's clothes, keeping his arm fully extended, and uses a modified sidestroke while towing.

## 4. By Shoulder Tow:

This is yet another tow for a weak or non-swimmer who needs to be taken across deeper water. Ask the casualty to hold on to your shoulders or waist whilst you swim with normal breaststroke. Only use this tow with people who you can trust to behave and not to panic.

Overall, it was a great session to learn all this technique.

## CLOSING CEREMONY:

The three days regressive training on Disaster Management for NCC cadets come to an end on 13 Jan 2021 with the closing ceremony at 1600 hrs. The chief guest for the program was Col A K Sharma, Group Commander, Mangalore Group along with Mr. Vivek Alva, Managing Trustee, AEF, Dr. Peter Fernandez, Principal, AIET, NDRF Team, NCC Officers, and NCC cadets. The Gp Cdr appreciated the efforts of NDRF team training NCC cadets and encouraged cadets to implement the learning whenever disaster situation occurs.

## OUR COMMITMENT AND ACTION

For any program to be conducted ground work is very important, on this occasion NCC cadets of Alva's College from 6 KAR AIR SQN NCC, Mangalore had done lot of work from start till end keeping in mind the importance of training for cadets. This program aspired the students to learn the importance of being MFR, methods to be followed after a disaster, bleeding techniques, breathing when anything is stuck in respirational tract, swimming tactics and saving with those swimming tactics etc.

## CONCLUSION

A total of 250 cadets from Army, Navy and Air Wing participated in this training program. In particular, 81 Air wing NCC cadets took part in training program. By the end of the training all cadets were well aware of the steps to be taken while any disaster and MFR's. Even in this pandemic situation the overall training sessions went well with the corporation of all the cadets and support from the NDRF team and the management.

Flt – B Air Wing NCC propose special thanks to The Commandant, 10 Bn NDRF, Guntur for approving our training request. We thank to NRDF team for imparting regress training for NCC cadets. We thanks to Mr. Vivek Alva, Managing Trustee, AEF, for encouragement and rendering all the support to conduct the event. We thanks to Sri. Umanath Kotian, MLA for greasing inauguration program. We thank Col A K Sharma, Gp Cdr, Managalore Gp for withness and bless closing ceremony of training. We thank Dr. Perter Fernandies, Principal, AIET and Gp Capt A G Srinivasan, CO, 06 Kar Air Sqn NCC for continues support in conducting such event.
