#### ABOUT JAVACOURSE

Java is a general-purpose programming language that is class-based, object-oriented, and designed to have as few implementation dependencies as possible. It is intended to let application developers write once, run anywhere meaning that compiled Java code can run on all platforms that support Java without the need for recompilation. Java applications are typically compiled to bytecode that can run on any Java virtual machine regardless of the underlying computer architecture.

VTU has introduced the course on Java and J2EE for the BE 7<sup>th</sup> semester. Continuing with the effort of training the members, a seven days Student Training Program is organized on "Core Java" at AIET Moodbidri by the Department of Computer Science and Engineering.
