ABSTRACT

An SMS app is another easy but effective idea. It will let you send the SMS to various numbers, just in the same way as you see the default messaging application in your phone. This project will help you with better understanding of SMS manager in androids. It is a platform that enables instant messaging. SMS app includes chat, calls and payments, sharing files and many more features. The app also allows you to save recipients details which can be accessed only by the user. It is fast and easy to use. It is highly reliable and secure.
