ABSTRACT

GST billing application system enables us to add products and items create customers and users and generate as many invoices, receipts and quotes as we require. A business cannot run without accounting. But, after managing all the hassles to grow any business, we will find little time to invest towards the finances. It helps maintain income and expenses, make trade analysis and determine if any business is doing well or if we need to work on some improvement statistics. We will also know if financial reconciliation is necessary. Furthermore, the multi-user facility restricts from accessing information not necessary for completing their job. All of these features provide you the ability to stay in full control of the financial aspect of your business. Just billing makes inventory and customer management easy, alongside billing. And this app runs on smartphones and tablets, thereby making any buisness in mobile and look more smart. This application is perfect match for small and medium buisness.
