ABSTRACT

Chess game application in Android is a simple android project and game. This project is all about the development of the chess game application. In this project, you can play the game by moving the set pieces. The whole project is validated in Java programming language. This project includes different images of the set pieces. Here, in this project, there are guidelines provided on playing the game. You can select your game level by increasing the star volume in the settings option. Also, you can check the set pieces details inside the settings options. This project is a multiplayer game which requires two players to play the game. Here you cannot compete with the computer in this project. The design of the project is simple and very attractive.
