ABSTRACT

The era of mobile technology opens the windows to the android app. The websites are vanishing and the mobile phones are emerging. It's the time to change from conventional websites to mobile apps. Which has become the part of our daily routines. We are introducing Katha Clone app application which is a Credit management android application which will replace recording credit amounts on the paper. This application also gives the overall amount that the user has to give or the overall amount the user will receive from others. This application also calculates the amount that the user will receive or give to the other person in contrast to individual person.
