ABSTRACT

The Java-based application proposes to create an online discussion platform that will consist of a wide range of questions on different topics, fields, and subjects. By creating a user-friendly environment of Bluebook implementation, this application is a resourceful tool for individuals who wish to practice mock quizzes and tests. Online quiz management system is one of the interesting java projects. In this project, you will build a comprehensive online platform for managing both quiz competitions and the participants in the different teams. This application can be used by academic institutions and any organization willing to find suitable candidates through the process of quizzing.
