ABSTRACT

This project Online Staff Recruitment System is an online website in which job seekers can register themselves online and apply for job and attend the exam. Online Staff Recruitment System provides online help to the users all over the world. This project is aimed at developing a web-based and central recruitment process system for the HR in ana organization. Some features of this system will be creating vacancies, strong application data and interview process initiation, scheduling interviews, strong interview results for the applicant and finally hiring of the applicant. This project Online Staff Recruitment System is an online website in which job seekers can register themselves. Then attend the exam based on the outcome of the exam. The job seekers will be shortlisted. For freshers, the exam will be conducted at some venue.

Online Recruitment System enables the users to have the typical examination facilities and features at their disposal. It resolves typical issues of manual examination process and activities into a controlled and closely monitor workflow in the architecture of the application.
