ABSTRACT

Most of people has dream to buy their own Car, customers having effort to buy a car according to their budget. For this reason, this project ease to buy a Car. This project will demonstrate the price of various Cars to luxury comfort Cars. This will help customers to identify their choice of Cars according to their planned budget. The project aims to reduce human effort of visiting car showrooms to pick their choice. This will rather help in providing the actual cost of the Cars available in selected showrooms. This project is developed using html, php, CSS languages and XAMPP, phpMyAdmin are used as back end to store data. Html and php are used for user interface.
