## **ABSTRACT**

The farmer is the backbone of our country. But nowadays, farmers and buyers find it hard to sell or buy required product, due to the presence of the middle man. There is a huge gap between the farmers and the consumers. Therefore it is necessary to bridge the gap between farmers and the buyers, without the involvement of the middle man.

Agrostore is basically a platform where a farmer is free to showcase his products for a reasonable price and buyers can directly access the products from the actual owner, without being cheated by the middle man, on both the ends. The process of selling and buying is purely transparent in this case.
