## ABSTRACT

Online Pizza Ordering System is to enable that the customer to place their order online at any time and from any place. The reason is to develop the system due to the issue facing by the food industry. These issues are such as peak hour-long queue, increasing take away of food than visitor, speed of food preparation and quality control of food management. Therefore the system enhances the speed and standardization of taking the order from the customer and displays it to the staff in the kitchen accordingly. It also provides user friendly web pages for online ordering. It will reduce the time for standing in the queue for ordering and make the customer to order the pizza at any time from their place.
