ABSTRACT

Movie Database Management System (FDS) is a dynamic web application created for the purpose of viewing information about movies such as trailers, downloading etc. It is designed as a one stop destination for the user to access the movies that have arrived and trailers of the movies that will be coming soon in theatres. Users can watch movies online and download it in a good quality. FDS application has a rich, user-friendly Graphical User Interface design. In today's digital world watching movies has become part of every individuals life. The main aim of FDS is to provide users with a good collection of movies with assured quality, so that user's environment is not compromised at any level.
