ABSTRACT

PAYROLL MANAGEMENT SYSTEM is a Database application which is helping for company for managing the payroll of employees. Operations supported by the applications are insert, delete, update and retrieve. Employer has rights to insert, update the Employees when they are in the company and delete them when they leave the company. A Registered Employees can view his details along with his salary and additions to salary as well as reduction based on his attendance. An Employer can view his details and perform insert, delete, update and display operation on the Employee.
