EXECUTIVE SUMMARY

This report describes the six Week mandatory internship conducted by the student at JBF Petrochemicals Ltd, Mangalore. The aim of the study is to study an organisation, its structure, departments and its functions. The purpose of the internship is to get the opportunity to connect the theory taught in classrooms to the practical working in a real organisation.

In order to assure good quality, JBF India and RAK have established state of the heart in house quality control Laboratories. Critical properties and colour are closely monitor. Sophisticated equipment's includes DSC (Digital Signature Certificate) for melting point/ crystallization UV-VIS (Ultraviolet- visible spectroscopy). Spectrophotometer, density gradient column, Polarography and Hunter Lab Colour Spectrophotometer. Quality control laboratory is managing by highly experienced and trained manpower.

Capital is the amount of debt & equity employed by a firm to fund its operations and its finance its assets. The structure is critically expressed as debt to equity. Debt and Equity are used to fund a business operations, capital expenditures acquisitions & other investments.

From the business perspective, an exclusive study was done on the Capital Structure shareholders pattern, future growth and prospects. Moreover a thorough SWOT analysis was conducted to highlight strategical strength, weakness, opportunities and threats. A financial analysis was conducted to calculate the ratio.

More important my view of the company is that it is positioned strongly, departments are well managed and employee working conditions are good.
