EXECUTIVE SUMMARY

This project titled "A Study on financial performance analysis with reference to S AND G Metal Building Solutions" is submitted to partial fulfilment of the requirement for the award of master of business administration. The project is concerned with the financial performance analysis tools and techniques in S and G Metal Building solution

The main objective of the study is for understanding the management of credit risk and manufacturing process of the company. For these purpose, the primary data is collected through the direct interaction with the primary manager and secondary data from companies annual reports, website, publications and textbook. Data collected from various source are analysed through the ratios, graphs and charts are used as tools.

Firstly, introduction of information regarding the company and topic, the company profile, organization profile, product profile, vision and mission statement and SWOT analysis are made. Then, statement of problem, objective of the study, scope of the study, methodology, various tools used for data collection and limitation of the study is is discussed. Subsequently, a detailed study is made on conceptual background of financial performance analysis. Analysis and interpretation is done on the basis of information regarding the practice of for analysis supported by a descriptive interpretations which implies figures into clear words.

Finally, the suggestions are given to overcome the drawbacks involved in the project on the basis of the analysis.
