Bridge Course Syllabus

Module 1

Trigonometry

Introduction to Trigonometry, Trigonometric Rational function, some basic identities-Sum and difference identities for cosine, sine, and tangent, Double-angle identities, half-angle identities.

Partial fraction

Resolving $f(x)/g(x)$ into partial fraction when

- i. $g(x)$ contains non repeated linear factors only
- ii. $g(x)$ contains repeated and non-repeated linear factors only.
- iii. $g(x)$ contains non repeated inducible factors only.
- iv. $g(x)$ contains repeated and non-repeated inducible factors only.

Module 2

Limits and differentiation

Definition of limit and continuity. Differentiability, statements of rules for differentiation of a sum, product and quotient of two functions. Differentiation of composite functions, polynomial, trigonometric, logarithmic, exponential and hyperbolic functions, implicit and parametric functions. Logarithmic differentiation. Second order differentiation.

Module 3

Integration

Integration as the reverse process of differentiation-standard forms, methods of Integration -substitution method, partial fraction, integration by parts-Problems. Definite integrals: Definition, evaluation of definite integrals based on all methods of integration - Problems,properties of definite integrals and problems.
