Dear Sir,

Subject: Seeking permission to visit your Esteemed Industry-Reg

Greetings from Alva's Institute of Engineering and Technology (AIET), Moodbidri, Mangalore.

The Alva's Institute of Engineering & Technology-AIET (A unit Alva's Education Foundation) is a premier Engineering college with more than 9 years supporting the cause of value based education offering education ranging from Under graduate programme to Post graduate programmes including Management & Engineering. The main vision of AIET is to impart quality technical education, moral values, social concern and patriotism to the students and mould them into excellent professionals and credible citizens.

We request you to permit our ISE Department Students to visit your Esteemed Organization.

As part of the curriculum, the industrial visit is mandatory so as to provide with them the real insight of working procedure of an esteemed organization such as yours and to fulfil the curriculum demand.

Kindly accord permission to visit your esteemed organization for a team of **58** (56 students+ 02 faculties) as per your convenience.

Preferable dates 3rd week of April (between 16th & 20th) OR 1st week of MAY 2018.

Your coordination in this regard will not only help the cause of education, but will also strengthen the youth of the nation.

Thanking you Sir,

Waiting with Anticipation

INDUSTRIAL VISIT REPORT

Industry Visited: **UDUPI POWER CORPORATION LIMITED (UPCL), PADUBIDRI**

Date of Visit: **20/04/2018.**

Batch Visited: **4th SEM ISE (4AL16)**

Industrial visit Co-ordinator: **Mr. Sharan Lional Pais.**

A batch of **48 students of 4th SEM ISE** along with **2 Faculties** (Mr. Sharan Lional Pais and Mr. Sudarshana K.) visited UPCL at Padubidri on 20/04/2018. This unit is a 2 X 600 MW imported coal based power project in the Udupi District of Karnataka.

BRIEF OVERVIEW OF COMPANY:

Operator: **Adani Power Limited (Adani Group)**

Capacity: **1200MW**

Address: **Yelluru village, Pillars Post, Dist.574113, Padubidri, Karnataka**

INTRODUCTION:

On 20-April-2018 we left from the college at 9am in college bus and reached at 10:30am, which was our reporting time. In industry premises we met Mr. Lalithaprasad Sharma, who is HR-Head of UPCL and he was our guide for the entire day during that visit. First as per safety major all students were provided with helmet, and then he guided us to go inside the plant.

The plant is roughly 7 or 8 km from the coast from where the imported coal for the power plant is transported to plant through rail line. UPCL is the first independent power project (IPP) using 100% imported coal as fuel in the country and was awarded the Gold Shield award for early completion of Thermal power project Unit-1 from Ministry of power, Government of India in FY 2010-11 and also the prestigious Golden Peacock Environment Management Award in FY 2014- 15.

PLANT DETAILS:

Each unit of 600 MW capacities has one sub critical coal fired steam generator connected to a reheat type condensing steam turbine and generator with sea water cooled condenser and all other required auxiliaries. Each steam turbine is of 3000 rpm, tandem compound, single re- heat, condensing type machine with extractions for regenerative feed water heating. The turbine would be designed for main stream pressure of 170 kg/cm² (a) and inlet temperature of 537°C.

Lalith sir first took us to DM plant where the sea water is pumped and purified with desalination process, and then he led us to Coal storage area where the imported coal from overseas is brought through train from harbour and the unloaded coal is stored at the yard. This coal is send to combustion through conveyer belts. Then we went to near cooling tower which is of 186 meters height.

Then we were taken inside the production area, he showed the boilers where the water is converted into high pressure steam with the heat generated by burning coal in combustion chamber, the high pressure steam is fed to two steam turbines which rotate at a speed of 3000 rpm which is connected to the generator through a shaft. The each generator produces 600MW power. The power generated is evacuated at two levels i.e. 220 KV and 400 KV. KPTCL has already commissioned the 220 KV transmission lines from the UPCL power plant to the substation at Kemar at a distance of 25 km. KPTCL is presently implementing the 400 KV transmission line from the UPCL plant to the PGCIL substation at Hassan located about 180 km from the UPCL plant.

Then we moved to control room, Lalith sir explained each system functions and the software which handles all operations are explained. Later he showed the full plant model demo, and we moved to ground floor. We thanked Lalith sir for guiding us throughout the plant.

All the students expressed their thanks to the officials for the opportunity given.

This trip was highly useful for the students in terms of practical knowledge about the Thermal power plant.

Sharan

Sir / Madam,

SUB: Permission to visit ISRO Satellite Centre – Reg.

We are in receipt of your post / email letter dated 08.12.2017 requesting permission to visit on the following date.

16th, February 2018	10.00 Hrs – 12.00 Hrs
---------------------------------------	------------------------------

Please get details of team members and faculty members along with an authorization letter from the Instructor to the Leader of the team (co-ordinator) restricted to **60** members only subject to the following conditions

The team may report to Reception Counter of this Centre 15 minutes in advance in order to complete the administrative formalities for issuing entry passes.

1. You are requested to strictly adhere to the time schedule mentioned above.
2. In case of any exigencies, we may cancel the above visit without any intimation.
3. Carrying Camera and taking photography inside this Centre is strictly prohibited.
4. Mobile phones and electronic gadgets are not allowed to be taken inside.
5. The visitors should declare items to be carried if any and seek permission, while entering this Center to the security personnel for checking.
6. No foreign nationals are allowed.
7. No Family members will be allowed inside this center.
8. After the visit Acknowledgement letter will not be issued from the organization.

Please note that our office is located on Old HAL Airport Road, Bangalore-560 017 next to National Aerospace Laboratories (NAL). Our telephones Nos. are 25084466, 25084468, 25084469 & 25084470.

The Professor accompanying the Students may kindly contact the Reception Counter of this Centre to complete the administrative formalities and for issue of Entry pass in time. Kindly acknowledge the receipt of this letter.

Yours faithfully,

Sd/-

INDUSTRIAL VISIT REPORT 2017-18

On 16th and 17th of February 2018, Department of Information Science and Engineering had organized Industrial Visit for 5th semester ISE students. Students were accompanied by two faculty of ISE department. The visit was planned to ISRO and HAL, Bangalore.

The visit started on 15th February 2018 at 9:00pm by a private bus booked for the visit. We reached Bangalore on 16th February 2018 at around 7:30am. We checked into nearby lodge at Majestic where we got fresh and started our journey to ISRO. We reached ISRO by 9:30am where after a few formal security checks we were let inside. Dr. Srinivasa (Sr. Scientist, ISRO) guided us by showing the models of various satellites, other space vehicles and explained the importance and working of the same. He also demonstrated working of some of the models. Later Dr. Srinivasa took us to system level facilities established in the center called as 'Clean Room' where we saw huge equipment's required to build a space craft and to test the working of the spacecraft. The clean room is equipped with harness lab for fabricating onboard harness of the spacecraft and Mechanical lab which is equipped with mechanical ground support equipment's required for the assembly, integration and testing of the spacecraft. They gave a chance to see the assembly work of ROVER-6 wheeler space vehicle to do research on moon. After that we were shown a short video on satellites and journey of ISRO after which Dr. Srinivasa cleared all our doubts related to ISRO and space technology. Around 2:30pm we left for HAL. As we reached HAL we were shown a small video based on the aircrafts used by the INDIAN AIRFORCE which were developed by HAL. We saw the models of airplanes and learnt about various people associated with the HAL. Around 5:30pm we left for the lodge.

On 17th February 2018, we started our journey to '*Visvesvaraya Industrial and Technological Museum*'. We learnt many new things in the museum. Dr. Kumar taught us about the space using 3D views of the planetary objects. After the session we left the place and started our journey back to AIET, Moodbidri.

This two days of industrial visit enriched our knowledge and helped us to know more about aerospace and satellites.
