## **Report on Knowledge Management & Intellectual Property**

The technical talk was conducted on 10<sup>th</sup> September 2020 by **Mrs. Subhagya. D.S.**, Consultant Engineer, Bengaluru, on the topic “Knowledge Management & Intellectual Property. In her talk she discussed about different forms of Knowledge Management and how students can make use of these concepts. She also highlighted different Intellectual Properties and explained about method required to avail patents.

### **Session on Patenting and Rights**

The main purpose of intellectual property law is to encourage the creation of a wide variety of intellectual goods. To achieve this, the law gives people and businesses property rights to the information and intellectual goods they create, usually for a limited period of time. This gives economic incentive for their creation, because it allows people to benefit from the information and intellectual goods they create, and allows them to protect their ideas and prevent copying. These economic incentives are expected to stimulate innovation and contribute to the technological progress of countries,

### **Question and Answer Session on Patenting and Rights**

Finally she concluded by giving inputs how one should go for patenting their innovative ideas and how it allows them to protect their ideas and prevent copying.

**Outcome:** Students gained knowledge about Management & Intellectual Property, So how then can protect their ideas and prevent copying.
