PROGRAM

ON

“LITERATURE SURVEY AND REVIEW PAPERS”

There is always confusion about how is literature survey different from literature review. Reviewing the literature relevant to a given field is a standard part of doing research. There is a standard procedure to conduct a literature survey to write a review article. To explain about the steps of literature survey to write a literature review, AIET conducted one day FDP on **Literature Survey and Review Papers** on 30-06-2021 in Innovation Lab.

The resource person for FDP was **Dr. Ajith Hebbar**, Department of Civil Engineering. He explained a step-by-step approach of literature survey in writing review papers. A literature review is a survey of scholarly sources on a specific topic. It provides an overview of current knowledge, allowing you to identify relevant theories, methods, and gaps in the existing research. Writing a literature review involves finding relevant publications from books and journal articles, critically analyzing them, and explaining what you found. He added - a good literature review doesn't just summarize sources—it analyzes, synthesizes, and critically evaluates to give a clear picture of the state of knowledge on the subject. The workshop was conducted for all AIET faculties.
