Report on the Digital Transaction Awareness Campaign

The Government of India has been undertaking several measures to promote and encourage digital payments in the country. As part of the 'Digital India' campaign, the government has an aim to create a 'digitally empowered' economy that is 'Faceless, Paperless, and Cashless'. There are various types and methods of digital payments.

After the launch of Cashless India, we currently have many methods of digital payment available in India. Some methods have been in use for more than a decade, some have become popular recently, and others are relatively new.

Students of V Semester ECE decided to conduct "Digital Transaction Awareness Campaign" in Badaga Yedapadavu Village to educate the villagers about using different online digital transaction modes. We requested head of the department for giving the permission to this campaign. We requested PDO Badaga Yedapadavu to allow us to visit Villagers. The Program was conducted from 16/03/2021 to 20/03/2021 under the guidance of Prof. SudhakaraHM, , Prof. Santhosh S, Prof. Pasannakumar And Mr. Joe Fernandez.

We started the Campaign with visiting house of Local leader and well wisher of AIET Mr. Sudhakara Poonja on 16/03/2021 and then visited different houses in Badaga Yedapadavu Village in 10 batches. We gave awareness to people about digital transaction and necessity of different documents.

Fig: Digital Transaction Awareness Program

We explained multiple benefits of digital payments.

1. Ease and convenience

One of the most significant advantages of digital payment is the seamless experience they provide to customers. Reduced dependency on cash, fast transfer speed, and the ease of transacting make online payments a preferred option. Traditional payment methods like cash and cheques add to factors like risk, steps, and physical presence. With digital payment, you can send and receive funds from anywhere in the world at the click of a button.

2. Economic progress

Customers transact more online when they see the ease, convenience, and security of online payments. This means that more and more people feel comfortable buying online, investing digitally, and transferring funds via electronic mediums. The increase in money movement and online business contributes to the progress of the economy. This is why online ventures are being launched every day and even more are making profits daily.

3. Safety and efficient tracking

Handling and dealing in cash is a cumbersome and tedious task. Along with the risk of losing money, there is the hassle of carrying cash everywhere you go and keeping it safe. With digital payments, one can keep their funds secured in online format effortlessly. Nowadays, your mobile phone alone is enough to make and receive payments.

4. Security: In the event of fraud you can address with your bank and make a claim.

5. Reduced theft risk: If used with correct knowledge there is no risk of theft.

We highlighted that following care should be taken for secured online transaction.

- There are many attempts to gain your personal information generally over email or text. Your inbox is probably full of emails, claiming that you've won a contest or you've been credited a certain amount of money. Never open these emails. Never reply to them. Learn to identify such spam mail and ignore them, or if you have the time, delete them.
- Keep track of your bank balance and how much you spend online. It's better to dedicate just one credit or debit card for online transactions. This makes tracking your online spending easier. If you find any suspicious behaviour, check with your bank immediately.
- Protecting your password is extremely critical and there are several key points you must remember:

Lat: 13.01800, Lon: 74.96913

Fig: Glimpse of Awareness at Badaga Yedapadavu Village

- Never share your password with anyone, even your family members.
- If you've written it down on a piece of paper, make sure to keep it safe. Writing your passwords anywhere is inadvisable, though.
- Change your password often, preferably after 2-3 months.
- Never keep the same password for all your accounts. If one of your accounts is hacked, your other accounts become extremely vulnerable.

Department of Electronics and Communication

- Never allow browsers to save your password.
- Make your passwords difficult to guess. Make a long password with alphanumeric characters and symbols. Make use of both uppercase and lowercase letters.
- Don't forget to log out
- Never just leave your device without logging out of your account. Most banks now have a system, where they automatically log you out after a period of inactivity, but it's better to do it yourselves.

To,

The students of Electronics and Communication Department

AIET

Sub: Appreciation letter for conducting Digital Transaction Campaign.

Dear Students,

On behalf of Badaga Yedapaduvu Grama Panchayath, I like to thank all students of your team for conducting most useful Campaign program to the vicinity of our panchayth from 16/3/2021 to 20/03/2021. Your willingness to contribute valuable time to the society shows your commitment to educate common people. The awareness given to peoples of our panchayath will help in the future to face Digital Transaction effectively and avoid online frauds.

I look forward much more association with you in future.

With regards,

H. O. D.
