ENVIRONMENTAL AWARENESS CAMPAIGN

The Civil Engineering Department of Alva's Institute of Engineering & Technology, Moodbidri, in association with NSS-AIET organized an Environmental Awareness Campaign on **Saturday 9th January 2021 in the department Room No. 505 at 10:00 AM.**

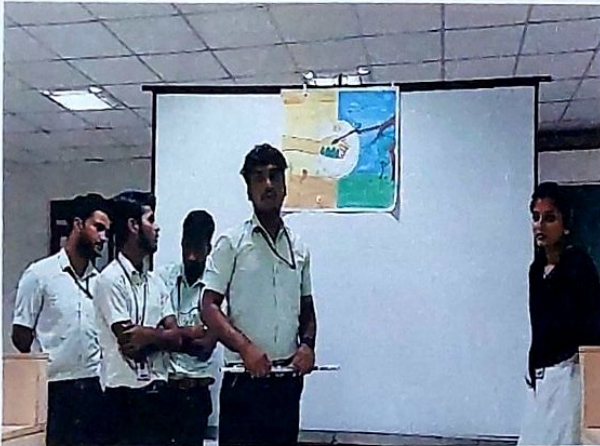

World educators and environment specialists have repeatedly pointed out that a solution to environmental crisis will require an environmental awareness and its proper understanding which should be deeply rooted in the education system at all levels of school education. An environmentally aware population makes better informed decisions and choices on complex environmental issues. Ecologically sustainable development requires an informed society that can make balanced decisions based on its economic, social and environmental welfare for current and future generations.

Thus, one of the best ways of preservation is by creating environmental awareness among society especially students as they are future leaders, future custodians, planners, policy makers, and educators of the environment and its issues. The campaign was conducted to know the awareness and sensitivity of the younger generation in environmental issues such as global warming, climate change and waste management. The student groups were told to collect the information regarding environmental issues in the recent years and prepare an awareness campaign with their innovative ideas. Results of the campaign would be of significance to the institution in the planning of activities related to the environment.

Environmental education is important to make people aware of environmental problems, to make them more knowledgeable about them, to provide them with skills and motivation to resolve those problems and to prevent new ones from occurring. As part of a community education program on solid waste management, environmental education is expected to develop the knowledge, skills and attitudes of the members of the community towards proper handling of wastes.
