**A 3 days report on Entrepreneurship awareness camp
conducted by Entrepreneurship development cell from
22/02/2018 to 24/02/2018**

INTRODUCTION:

Entrepreneurship Awareness camp is one of the useful camp to develop the business skills and get a brief idea about entrepreneurship.

Day 1: On the first day introduction to the EDC was given, some of the famous entrepreneurs were introduced. Then a video was shown about the young entrepreneurs which was a motivation for all of us. From this they came to know the fact that age is not the limit or restriction to start an enterprise with creative ideas. Students were divided into four different groups. Then the first session was ice breaking session in which they had to introduce them self to their teammates to know well about each other. Then each group was given a task to generate ideas related to general topics or solution on real time problems. Each team came up with many innovative ideas which were encouraged by the guides.

In the afternoon session they had a industrial visit to DHANALAXMI cashewnut industry which was near to moodbidri, where they got a wonderful opportunity to see how an industry works, it was really a very good experience for all of them. They got to know the working of machineries got information regarding the processing of cashewnuts. They also noticed the various problems faced by the workers which was mainly due to manual handling of machineries and noise generated by the machineries. From this they came to conclusion that they have to improve the working conditions of the workers by generating ideas to reduce the errors in the machines.

Day 2: The day started with the inspirational talk by the eminent person by the name Mr.Yashasvi Nag from EDII Ahmedabad. He gave them the brief idea of how to start an enterprise and what are the necessary resources to start an enterprise .He also showed them some motivational videos .He also gave various successful examples of entrepreneur and inspired us to generate innovative ideas which helps them to solve present social problems and how to get solutions for unemployment problems .

Afternoon session was an idea generation session in that each team was given various trending sectors like irrigation, power generation ,education, medical, information security and so on .For the above sectors they had to generate the ideas to solve the respective sector problems. By the evening cashew industry owner joined with us to share his experience in his business field and also suggested us to make a startup in our interested field.

Day 3: A great resource person by the name Mr.Sundar joined us on the third day. He spoke about how to make our minds free to generate ideas .He gave them the actual reason why the innovative ideas are not yet generated even though the minds are innovative. He gave them some solutions for making our mind innovative and stress free in our mind. At last the session ended with the game .Three teams were made ,in which one person from each team was said to built the tower using the wooden blocks with the eyes closed ,only by using his left hand.

The conclusion was to build any enterprise that we need three main persons they are entrepreneurs, financial supporters and the directors.
