4.2.1: Library is automated using Integrated Library Management System (ILMS)

Library is put to optimal use and is the place of dissemination of knowledge through both traditional and modern methods at the institute. Integrated Library Management System (ILMS) is an application software as a part of library automation.

EASYLIB Web Version 6.4a is fully automated right from indenting of books, procurement and also it is equipped with RFID technology. The RFID, enables to issue, renewal of books, maintain the database of books, journals, periodicals and to maintain the data of students and faculty who utilize the library resources.

New upgraded software OPAC Module helps to view library collection, further user can check profile like book due details, transaction statements, and reservation of books etc. on campus or remotely.
