Second session was by Dr. Syed Zakir Ali, Middle East College, Oman, Muscat. He explained about Continuous Assessment –Some Experience to Improve Quality in Teaching Learning Process. He also explained about Preamble to assessments in affiliated Engineering Colleges, Challenges and problems associated with such assessments, What happens in the Continuous Assessment, how it will happened and What learning process will help in Continuous Assessment, Concept of Knowledge obtained from learning and how to store and apply the knowledge in further stages for learning. He concluded the session by explaining how teachers need to proactive in building up the career of their students.

Conclusion:

- Teachers need to be proactive in building up the career of their students
- Continuous Assessments will have a positive impact on the knowledge gained by students.
- Hope that teachers will own responsibility of their students.
- Management committee members can ponder on their issues.
- Just by reading books, a student cannot attain the knowledge
- You cannot attain philosophy just by reading chunk of books, rather you have to be in an environment which allows you to observe the people who attained philosophy, which is the key difference between distance education with on campus education.

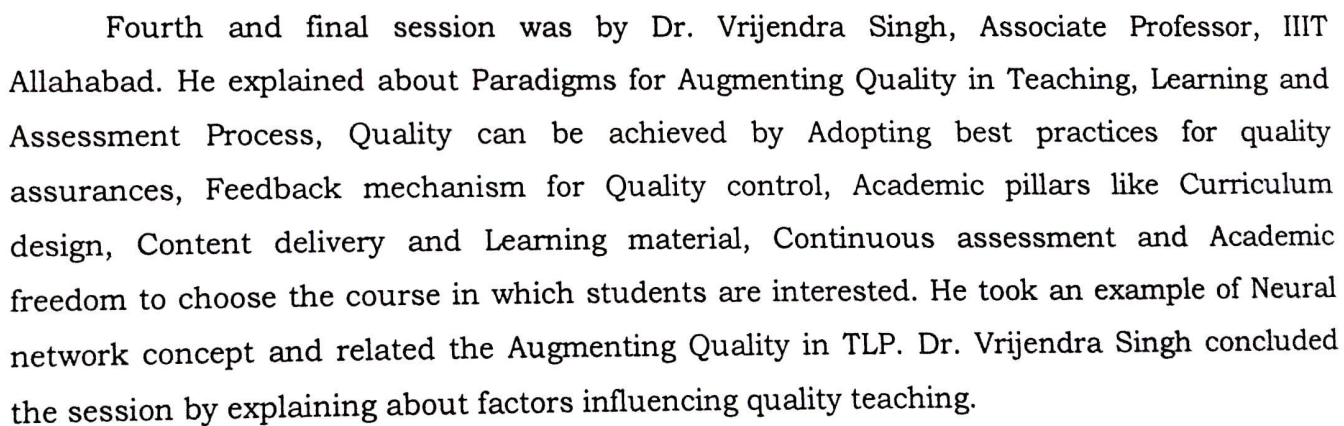

Participants: Shilpa AET, Nani Kumar, Venkatesh Dr. Asst. Pr., Divya MITA, NITHIN K, Divya Hegde, Jayashanker Reddy, Dr. Chaitanya Malhotra

Third session was by Dr. Mohammed Javed, IIIT, Allahabad. He explained about Teaching-Learning-Assessment Best Practices in CS/ IT, A case Study with two related Courses- Computer Programming and Design and Analysis of Algorithms. He also explained How to motivate the students for doing the projects and also programming assessment. He also suggested that it's a good practice one should follow to submit the assignment in the IEEE format i.e the professional report. He concluded the session by giving awareness about what is a problem and what are the steps to be taken in order to solve that problem in terms of computer science.

Factors Influencing Quality Teaching

- **Teacher knowledge, skills, dispositions, and behaviors** that support the learning process. Many studies have already been done on it. Hanushek et al. estimate the individual teacher effects component of measured student achievement is about 7%-10% of the total.
- **Student availability for learning** – Health issues, challenging family environment, attendance, Prior learning opportunities etc.
- **Resources for learning & Learning Strategies** – Curriculum quality, foundation course, learning materials, class sizes, specialist supports, collaborations/MoU/Joint Degree/Dual Degree etc. with other National/International Institutes.
- **Coherence/Use of Technology** – The extent to which content & skills are well organized and reinforced across classes. The expert should teach in all the sections for L Component. Promoting collaborative works among students etc.
