Report on

**5 day workshop and Training program on ISO 9000 AND 14000 standards
from 29/01/2018 to 02/02/2018**

Invited Speakers:

1. Mr. T. D. Anil Kumar and Team, Bureau Veritas (India) Limited, Bangalore
2. Dr. K. S. Lokesh, Registrar, JSS S&T University, Mysore
3. Dr. Udayashankara T. H., Professor, JSS S&T University, Mysore
4. Dr. H. Lakshmikantha, Environmental Officer, KSPCB, Udupi
5. Dr. Ravi D. R., Environmental Officer, KSPCB, Bangalore.

The ISO 9000 family of quality management systems standards are designed to help organizations ensure that they meet the needs of customers and other stakeholders while meeting statutory and regulatory requirements related to a product or program. ISO 9000 deals with the fundamentals of quality management systems, including the seven quality management principles upon which the family of standards is based. ISO 9001 deals with the requirements that organizations wishing to meet the standard must fulfill.

ISO 14000 Standards have achieved a great worldwide interest due to the benefits they may bring when successfully implemented in industries. They play a vital role in the wide range of industrial activities. The ISO 14001 is internationally accepted regulation about Environmental Management Systems for all types of industry activities. Developing an Environmental Management System in line with ISO standards in a company will increase its efficiency in natural resources management and diminish wastes and emissions. In addition, it will mean cost saving and improvement of the company's public image. Hence it is highly recommended to run an EMS in industries, which, on the other hand, are growing in number and complexity. Keeping this in view, the department is planning to organize a 5 day Workshop and Training Programme, to address the needs of Engineering fraternity, which includes technical institutions and corporate world.
