"Outcome Based Education Awareness" by Prof.Dr. Badhusha

Outcome based education is student centered instruction that focuses on measuring student performance i.e. outcomes. Outcomes include knowledge skills and attitudes. Outcome based accreditation – focus remains on evaluation of outcomes of the program, though Input and Output parameters are also important Input and Output parameters are also important .Sir,explained about Why outcome based accreditation.Sir also explained about globalization has brought in a clear shift from education as transmission of expert knowledge to education as building learner competencies including learning to learn and life long learning. That means focus will have to be on understanding fundamentals very well, and learning new skills/competencies that would enable individuals to cope with the demands of the rapidly changing workplace. Prepare global engineers who will have to solve problem and shoulder challenges which are not even known today
