Academic year 2019-20

“A SEED BOMB PROGRAMME TO INCREASE GREEN COVER ACROSS MIJAR”

Now a day India is facing a major problem is Deforestation to control that we have an Idea that is Seed Bombing, we are going to implement these technique in our area to increase the Afforestation.

This activity is the outcome of the sincere efforts of all the team members along with the support of management and coordinators, technical and non- technical. Special thanks HOD Civil Dr. H Ajith Hebbar, NSS-AIET, the Principal Dr. Peter Fernandes and Managing Trustee, Mr. Vivek Alva.

OBJECTIVES

The main concern of this activity was to inform and guide the local people and individual on how far the nature conservation and how to use the seed bombs. The broad objectives of the study were as follows:

- To Increase the Afforestation.
- To assess the level of knowledge of local people about the Nature.
- Students will learn a new method for dispersing seeds that has both artistic and historical value.

REPORT ON SEED BOMBING PROGRAMME

INTRODUCTION

The Department of Civil engineering, Alva's institute in Association with NSS-AIET organised an activity to promote "Nature conservation" on 11th February 2020 through Seed Bombing programme in the mijar village. All second year students of the Department have participated in this campaign. All participants have taken oath to make and keep Nature in Good condition.

This activity will make 7000-9000 seed bombs and can be a fun and tactile way to engage students in gardening. We have used 8 variety of seeds that attract beneficial insects including: Teak, Tamarind, Indian Beech, Athi, etc. Be aware of where you spread perennial seeds or self-seeding annuals, as well as noxious weeds in your area.

Students have worked for at most 80 hours. We have tried to make efforts in working for the betterment of the society and the Nature. We at our level best have tried to contribute to the Nation in the field of Nature conservation.

ACTIVITIE STEPS

The steps we are taken in the making of seed bombs

- Students are informed to collect the different variety of tree seeds from their native place on the occasion of Diwali on November.
- After returning from holidays they prepared the seed bombs under the guidance of faculties. The process involved is: Hand mix assorted seeds, dry organic compost, and dry clay together in a large bin.
- Mist or pour a small amount of water onto the bin while continuing to mix. Spray or add just enough water so that the mixture binds together but does not stick to your hands.
- Take a pinch of the finished mixture and roll into penny-sized round balls in the palm of your hand.

- Put seed balls on a tray to completely dry in the sun for a day or two. Store in a dark, dry place or throw seed balls into the garden. Water to allow seeds to just. To prepare the seed balls it take 3 days to make 300 seed bombs per student.
- After the dry of Seed bombs, students donated the Seed bombs to society by telling the importance of nature, conservation of nature, about the seed bomb how to use the seed bomb.

CONCLUSION

This activity has brought a sense of team work, enhancement of communication skills, behavioural approach and interaction with local people towards the betterment of one aspect. We are thankful to our teachers, mentors, guidance team, staff, and helpers to be an active part of such an organised activity. To conclude with this activity played a major role for an individual to develop the nature.

OUTCOME

The program has helped students to,

1. Develop a better understanding of their local environment.
2. Reconnect with nature, increase their appreciation for their surroundings, deepen their sense of connection with nature, and inspire a spirit of environmental stewardship.
3. Work for restoring native plant habitat to preserve biodiversity.
4. Put a collective effort to nurture and sustain the living landscape for birds and other animals.

To,

The Principal

Alva's Institute of Engineering and Technology,
Moodbidri

Sub: Letter of Appreciation for Seed Bombing Programme.

The students and faculties of Civil Engineering department, Alva's Institute of Engineering and Technology, Moodbidri has conducted Seed Bombing Programme for making the people aware of the sowing of seed pellets to grow and preserve the green forest in the area of Mijar on 11/02/2020. We wish that you will keep contributing in the same spirit for the conservation of nature.

We would like to congratulate the faculties and the students of their institute for organizing this programme.

With Regards,

ಅಧ್ಯಕ್ಷರು
