ABSTRACT

Bluetooth chat will help you to send short messages using Bluetooth technology. You can chat with your friends if you are in the Bluetooth range and don't have access to internet. It will be helpful for the students if there is no WI-FI in their school, for people who want to chat with their friends during the unavailable of internet access and in many other cases. Easy Graphical user interface which provides effective user experience for the user. The user can read the conversations even when there is no Bluetooth connection between the other users, as the conversations get saved automatically in the application.
