ABSTRACT

Placement App Project is an application, as the name suggests it is a Placement guide holding app. It'll store the student's details and their upcoming drives or events. In this application, users will be enabled to mark their important dates as well. To make it safe, provide a login page before the user can access it. They will get the access to the write section. Here the users can note down the things and store them permanently. Users can also alter the data or delete them. User can note the Placement dates that are to be done in a descriptive way and able to attend as many as the user can. Once the drive is completed, the user will be able to remove it .The drives that are currently available will be stored in the list view.
