ABSTRACT

This is a simple project for college students that is aimed at teaching kids the colors and similar object in an interactive manner. It will show colors in the form of shapes and drawings to make it interactive learning. It will show the colors and the object inside it. After that, the person has to tap another object to check weather the selected objected is correct or not. If they answer correctly, it will move to forward for the next similar pattern. The users would be mainly the kids thus this application will be built as simple and interactive as it can. There would be a no. of options provided to them from which they will choose one.
